

Crown Cork & Seal: Preventive care benefits

The following services are 100% covered when received in-network

Preventive care can help detect health conditions early, improve long-term health outcomes and reduce the risk of serious illness. It also provides access to recommended screenings and preventive services to help you stay healthy.

Preventive and routine services

- Pelvic exams
- Prostate-specific antigen (PSA) tests and prostate exams
- Colonoscopies, sigmoidoscopies and similar preventive screening procedures
- Counseling for alcohol use, substance use disorder (SUD), tobacco/nicotine, obesity, diet and nutrition

Women's preventive health benefits

- Mammograms
- Pap tests
- Treatment for gestational diabetes
- Human papillomavirus (HPV) DNA testing
- Breastfeeding support, supplies and counseling

General preventive health benefits

- Counseling for sexually transmitted infections
- Counseling for HIV
- Counseling for interpersonal and domestic violence

Crown Cork & Seal preventive enhancements

Crown Cork & Seal medical plans also provide certain coverage that exceeds standard preventive care guidelines:

- The first PAP test, PSA test, prostate exam, mammogram and colonoscopy each calendar year is covered at 100% under preventive benefits regardless of diagnosis billed.
- The first breast ultrasound, breast MRI, and breast pathology evaluation as a follow-up to a mammogram is covered at 100% under preventive benefits.

Questions?

This list is not all-inclusive, and preventive services are subject to change. To confirm coverage for services, please call UMR at **844-586-7310**.
